Leveraging Analytics to Plan for 2022

Today's Presenters

Andy Guarnera

*Director of Product Management,
Data & Analytics*
Homecare Homebase

Michael Brents, PT, DPT, MHA

Vice President, Business Intelligence
Home Care & Hospice Division
CommonSpirit Health at Home

Today's Agenda

- Homecare Homebase & HCHB Analytics
- How to use data to create benchmarks and targets for the future
- Using analytical tools for forecasting and targeting admissions
- Plan for staffing needs using data
- Anticipating the financial impact of regulatory changes
- Q&A / Closing

Operational Visibility & Data Analytics

- **Business intelligence platform**, providing HCHB customers insights into their operational, financial, quality, and clinical data
- Over 100 **role-based dashboards** out of the box
- Configurable and customizable – trained users can perform **ad hoc analysis**, and **build/publish custom dashboards**

 **HCHB Analytics**

Defining Most Important Metrics

- Highest value
 - What are your organization's largest pain points?
 - What metrics would yield the most value to your organization?
- Measurable
 - Do you know what your expectations are?
 - Can you translate expectations into targets?
- Actionable
 - Once you identify opportunities, can you take action to improve?
 - Are improved results within your control?

**This presentation in its entirety is confidential & proprietary. Contents are property of Homecare Homebase, LLC. All Rights Reserved. Content is not to be repurposed or used outside of its intended purpose, do not share without permission of Homecare Homebase.*

Approaches to Benchmarking

- **Internally:** Benchmark against your own organization
 - Branch locations
 - Teams
 - Case managers
- **Externally:** Benchmark against your peers
 - Other organizations of similar size (HCHB medians)
 - CMS provided averages/medians

**This presentation in its entirety is confidential & proprietary. Contents are property of Homecare Homebase, LLC. All Rights Reserved. Content is not to be repurposed or used outside of its intended purpose, do not share without permission of Homecare Homebase.*

Set Targets

- Percentile of benchmarks (top 10%, top 25%, etc.)
- Realistic, achievable, sustainable
- Align with what works best for your organization
- Consider volatility of each metric

**This presentation in its entirety is confidential & proprietary. Contents are property of Homecare Homebase, LLC. All Rights Reserved. Content is not to be repurposed or used outside of its intended purpose, do not share without permission of Homecare Homebase.*

Monitoring Against Targets

- Focus on problem areas, manage by exception
- Create a single source of truth, and common language
- Provide visibility to all levels of stakeholders (executives, regional directors, branch management)
- Consider optimal delivery mechanism for each metric (push vs pull, self-service dashboards, etc.)
- Use data to inform and drive positive change in your organization

Use Color to Draw Attention to Problem Areas

Using Analytical Tools for Forecasting and Targeting Admissions

Forecasting and Targeting

- Forecasting feature in Tableau yields better future period projections
- Automatically optimizes proportions of trend vs. seasonality
- Examples: a) Budgeting annual targets
b) Patients taking Coumadin for PT/INR orders

Initial	Change From Initial	Seasonal Effect		Contribution		Quality
07/21	07/21 – 12/22	High	Low	Trend	Season	
111 ± 29	-18	08/22 27	04/22 -32	23.3%	76.7%	Ok

All forecasts were computed using exponential smoothing.

**All screenshots are based on sample data.*

Plan for Staffing Needs Using Data

Use Data to Drive Staffing & Accountability

- Monitor field productivity metrics and utilization data to inform field staffing needs
- Use back office productivity data to inform your staffing model
- With industry wide staffing shortages, optimizing your staff is more critical than ever

Anticipating the Financial Impact of Regulatory Changes

CMS Impact Model

- Updated upon each proposed and final rule
- Models current year PDGM periods based on future year changes
- Assess the impact that CMS changes have on:
 - Revenue
 - Case mix
 - Functional Impairment Level
 - Comorbidity Adjustment mix
 - Outlier revenue
 - Wage index

*All screenshots are based on sample data.

Medicare Timely Billing

- Track days to RAP, days to Final
- View aging of unbilled periods
- Monitor potential bottlenecks that can hold up timely billing

Future Regulatory Changes

- Expansion of VBP
 - CMS proposing to roll out to all 50 states in CY2022, with CY2024 as the first payment year
 - Proposed maximum payment adjustment, upward or downward, of 5%
 - CMS will assess HHA performance on applicable quality measures based on benchmarks, achievement thresholds, and improvement thresholds
- Notice of Admission (NOA)
 - Starting in CY2022, agencies will submit a one-time NOA that establishes the period of care
 - Payment reduction if NOA is not submitted within 5 days from the start of care
- HCHB is currently building new dashboards to help agencies monitor related metrics and minimize penalties specific to NOA and VBP
